

CHECKLIST

SBTi Readiness Checklist

Is your business ready to pursue Science Based Targets?

A practical self-check before pursuing Science Based Targets validation.

Carbon Footprint

- Scope 1 and Scope 2 emissions have been calculated for at least one full year
- Relevant Scope 3 categories have been identified, even if not yet fully quantified

Management Commitment

- Leadership is aware of, and supports, a target-setting process
- A budget or resource has been allocated to decarbonisation activity

Data Quality

- Emissions data is based on actual bills/records, not rough estimates
- A process exists to collect this data on an ongoing basis

Reduction Opportunities

- Energy efficiency or renewable energy options have been reviewed
- At least a preliminary view exists on where reductions are achievable

Governance

- A named person or team is responsible for climate target performance
- Progress can realistically be tracked and reported on an annual basis
